

We deliver your products according to your requirements when you need them at an outstanding cost-performance ratio. Our focus on personalized customer support allows us to efficiently and consistently guarantee a high standard of quality. REYcomp utilizes cellular manufacturing techniques, single-piece flow, standardized work and pull systems to continually reduce customer lead-time and drive excess inventory out of the process.

Firm Principles and Traditional Values

THE COMPANY

We are your competent partner for electronic assemblies that range from surface mount and through-hole as well as wire harnesses all the way to complete product box build, system and panel assembly.

REYcomp has over 25 years of experience in miniaturization of Printed Circuit Board Assembly. Our Siemens machines cover the complete spectrum of case sizes, including QFB, BGA, uBGA CBDA, CSP and Flip-Chip.

QUALITY and FLEXIBILITY

Creative solutions to make your product better,

so that you have one less hassle to deal with.

Our goal is to help you cut costs by simplifying your assembly outsourcing.

Your needs decide the extent you want to be involved in our process depth.

Prototyping and Development

We specialize in complex prototyping projects with rapid turn-around times.

REYcomp INC

- COMPETENT
- COMPREHENSIVE
- CONSISTENT

We realize your ideas with you, no matter if you want us to take care of partial tasks or your entire project. Even during prototyping we give consideration to what is being produced. We provide recommendations for components and material selection while always keeping an optimal price-performance ratio in mind. Our customers are our first priority and at REYcomp, customer service translates to more than simply meeting customer needs. Instead, we work to anticipate your needs. It's why you can depend on us.

SMT, TH and Cable Assembly

Individual Assemblies, Modules or Devices. Medium-volume high mix and/or High-volume low mix. REYcomp is a competent and trusted partner for all of your tasks.

Vision... Collaboration... Results!

RELIABILITY AND TRACEABILITY

We have established a good balance of speed, precision and flexibility with our Surface Mount and Through Hole manufacturing processes. All of our medium to large volume orders are processed with our picking place and wave solder machines. At REYcomp, PCB production and test comprises all technology combinations, including product-specific special processes. All assemblies are available in lead-free (RoHS compliant) or lead (MIL spec) technology, in accordance with IPC-A-610 and AS910.

SOLUTIONS

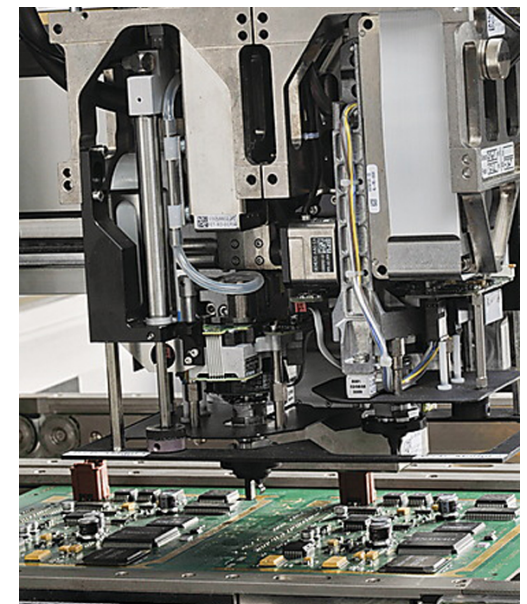

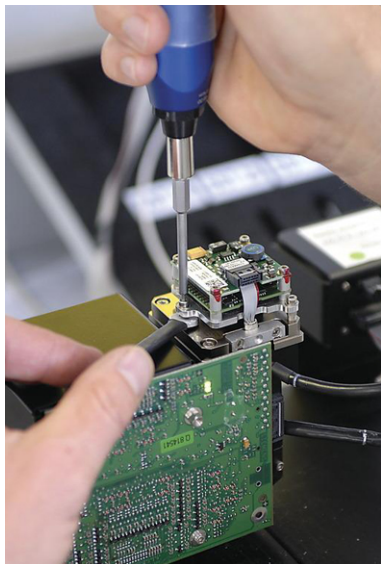

Our global supply chain management expertise can ensure competitive pricing on component sourcing for your project. Or, if you prefer, you can ship the materials directly to us. Either way, our electronics assembly services can save you time by handling supplier-management related activities.

Demand variability, cost reduction goals and your company's continuous improvement initiatives are carefully considered by us in developing an optimal solution.

Repair and Maintenance

When boards are too expensive to scrap, let us remove and replace only the necessary components.

OUR MANUFACTURING FACILITY PROVIDES REGIONAL SUPPORT OPTIONS WHICH CAN HELP YOU LOWER YOUR LOGISTICS COSTS.

Allow us the opportunity to show you the difference.
